JAIDEEP M C

AI/ML Enthusiastic | Full-Stack Developer | Cloud Certified

jaideepmc2003@gmail.com | Bengaluru, India | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Results-driven Computer Science & Information Science Engineering student (GPA: 9.03/10) with hands-on experience in AI/ML model development, full-stack web development, and cloud computing. Proven ability to build production-ready systems including a CNN-based fire detection model (95% accuracy), an LBPH facial recognition attendance system (98% accuracy), and an ECG arrhythmia classifier (98.89% accuracy). Certified on Microsoft Azure (AZ-900, DP-900, PL-900), Oracle Cloud Infrastructure, and NVIDIA Generative AI. Seeking roles in AI/ML engineering, data science, or software development.

TECHNICAL SKILLS

Languages	Python, Java, JavaScript, TypeScript, SQL, R, C, C++, HTML, CSS
Frameworks & Libraries	TensorFlow, PyTorch, OpenCV, React, Node.js, Express.js, Django, Flask, Spring Boot, FastAPI, Fabric.js, Tailwind CSS
Databases	MySQL, MongoDB, PostgreSQL, SQLite, Neo4j
Cloud Platforms	Microsoft Azure (AZ-900, DP-900, PL-900), Oracle OCI (Gen AI, Data Science), Google Cloud, AWS
ML / AI	CNNs, LBPH, Weighted KNN, LLMs, Generative AI, Data Augmentation, Model Training & Deployment
Tools & DevOps	Git, GitHub, Docker, Jupyter, Google Colab, VS Code, Tableau, Power BI, Kaggle

WORK EXPERIENCE

AI & Data Analytics Intern
Apr 2025 – May 2025

Edunet Foundation | AICTE | Shell (Skills4Future) | Bengaluru, India (Virtual)

- Developed CNN-based forest fire detection system achieving 95% classification accuracy on held-out test data using TensorFlow.
- Designed end-to-end image preprocessing pipeline with resizing, normalization, and advanced data augmentation to improve model generalization.
- Architected deep CNN with optimized feature extraction layers; achieved high precision, recall, and F1-score for reliable real-time inference.
- Built production-ready environmental monitoring solution with potential integration into disaster management and emergency response systems.

AI/ML Intern
Nov 2024 – Dec 2024

TechSaksham | Microsoft & SAP (CSR Initiative) | Bengaluru, India (Remote)

- Built real-time Facial Attendance System using LBPH face recognition, achieving 98% identification accuracy under varied lighting conditions.
- Designed end-to-end data pipeline covering dataset creation, model training, and persistent storage of weights and label mappings.
- Implemented automated attendance logging (Name, Date, Time) with duplicate-prevention logic to ensure data integrity.
- Delivered modular, reusable architecture applicable to classroom, corporate, and access-control environments.

Data Analytics Intern
Oct 2024 – Nov 2024

VOIS (Vodafone Intelligent Solutions) | Bengaluru, India (Remote)

- Analyzed large-scale business datasets to surface trends, patterns, and actionable insights using Python, SQL, and statistical methods.
- Optimized complex SQL queries and database operations, reducing data retrieval time by 35%.

- Designed and delivered 8+ interactive dashboards and visualizations in Excel, Power BI, and Python for executive stakeholder presentations.
- Performed A/B testing and hypothesis validation to support data-driven decision-making across business units.

PROJECTS

ECG Arrhythmia Detection & Classification System *Jul 2025 – Jan 2026*

Tech Stack: *Python, SQLite, Gemini API, Flask, Machine Learning, Plotly*

- Built a state-of-the-art ECG arrhythmia detection system using Weighted KNN, classifying 13+ arrhythmia types with 98.89% accuracy.
- Implemented multi-source input support (CSV, image upload, manual entry) and interactive Plotly dashboards for real-time ECG wave analysis.
- Integrated automated PDF clinical report generation, a doctor portal, and Telegram/Email alerts for high-risk cardiac events.
- Key Result: 98.89% classification accuracy | Real-time clinical alerting pipeline

ADGENESIS – AI-Powered Design Platform *Nov 2025 – Jan 2026*

Tech Stack: *React, FastAPI, Fabric.js, PyTorch, PostgreSQL, Tailwind CSS, GPT-2*

- Developed full-stack AI design SaaS platform that converts natural language prompts into professional design blueprints in real time.
- Built Fabric.js-powered canvas editor featuring 50+ templates, brand kit management, and multi-format export (PNG, PDF, SVG).
- Fine-tuned GPT-2 model for design blueprint generation using a custom ML pipeline built on PyTorch and FastAPI backend.

Forest Fire Detection using CNN *Apr 2025 – May 2025*

Tech Stack: *Python, TensorFlow, CNN, OpenCV, Kaggle*

- Trained deep CNN for binary fire/no-fire classification achieving 95.2% accuracy on Kaggle dataset with automated preprocessing pipeline.
- Implemented real-time inference capability suitable for integration with drone-based or CCTV environmental monitoring systems.

Facial Attendance System *Nov 2024 – Dec 2024*

Tech Stack: *Python, OpenCV, LBPH, Machine Learning*

- Webcam-based attendance management system using LBPH face recognition with automated model training and duplicate-prevention logic.
- Achieved 98% recognition accuracy; complete data persistence with trained model weights and label mappings.

EDUCATION

Bachelor of Engineering – Information Science Engineering *2022 – 2026*

JSS Academy of Technical Education, Bengaluru, India | GPA: 9.03 / 10.0

CERTIFICATIONS & CREDENTIALS

- **NVIDIA-Certified Associate: Generative AI LLMs** — NVIDIA *Dec 2025*
- **Microsoft Azure Fundamentals (AZ-900)** — Microsoft *Oct 2025*
- **Microsoft Azure Data Fundamentals (DP-900)** — Microsoft *Oct 2025*
- **Microsoft Power Platform Fundamentals (PL-900)** — Microsoft *Oct 2025*
- **Oracle Cloud Infrastructure 2025 Certified Generative AI Professional** — Oracle *Oct 2025*
- **Oracle Cloud Infrastructure 2025 Certified Data Science Professional** — Oracle *Oct 2025*
- **Neo4j Certified Professional** — Neo4j GraphAcademy *Jun 2025*
